Valentine Girls Temperament Overview:

The Valentine puppies are overall confident and self-assured after a short adjustment period. While they were initially a little timid, they adapted very well and independently. Once given a chance to adjust, they showed little to no stress in new situations, whether around unfamiliar people or in circumstances typically considered stressful. Socially, these puppies are appropriate in their interactions with one another, as well as with cats and other dogs. They also behave appropriately with people. While they may use their mouths to initiate or engage in play, they exhibit excellent bite inhibition. They are only vocal as noted in the individual puppy observations.

Overall, these puppies show good motivation for interaction, food, and toys, with fairly equal and balanced levels of interest. A few of the puppies—specifically Pink, Green, and Blue Dot—are more motivated by interaction than anything else. These particular puppies demonstrate outstanding focus, well above average for their age. They also exhibit above-average memory and problem-solving abilities. All of the puppies are comfortable with and tolerant of handling and restraint, with most actively seeking out this type of interaction. These puppies show no red flags and no signs of possessiveness. They are fairly consistent in temperament, with only subtle differences between individuals.

Valentine **Pink**

POTENTIAL THERAPY CANDIDATE

- **Energy Level:** Mid
- **Personality:** Pink works to get and keep your attention and shows excellent potential for therapy work. She prefers being with people rather than alone and will do best in a home that is interactive and engaged with her.
- **Health Notes:** N/A

Valentine **Red**

- **Energy Level:** Mid
- **Personality:** Red is a little more independent than some of the other puppies in the litter, but she is still very personable, playful, happy, and social. She is well-balanced. She would do best in a home that allows her space to explore but also offers plenty of companionship and playtime.
- **Health Notes:** N/A
