Skylar Litter Temperament Overview:

The Skylar litter overall is confident and self-assured after a brief adjustment period. Once comfortable, they show little to no stress in new situations, whether around new people or in circumstances typically considered stressful. They are curious and investigative with new sights and sounds, even those that could be considered startling.

These puppies have good memory, focus, and problem-solving abilities that are average for their age and stage of development. They are highly motivated by interaction, with good motivation for food and toys as well. Socially, they are very appropriate in their interactions with one another, with cats, and with other dogs. They are also well-mannered with people. While they do use their mouths to initiate play, they demonstrate very good bite inhibition. They are rarely vocal, show no possessiveness, and are all comfortable and tolerant of handling and restraint.

The overall impression of this litter is that they are exceptionally sweet, playful, and happy puppies who will bring joy and affection to their future families.
