

# Meet the Parents

## Janelle x Swindell — Parent Overview

### **Janelle:**

**Weight:** 52lbs

**Breed:** F1 Goldendoodle

### **Swindell:**

**Weight:** 32lbs

**Breed:** Moyen Poodle

**Together,** This is a repeat breeding, and we are fortunate to have a real, established assessment from the prior litter to guide expectations for this pairing.

The Janelle litter consistently produced puppies that were confident and self-assured, showing a natural balance between independence and people-oriented engagement. While content to explore and play on their own, these puppies clearly preferred being near their people and forming strong social connections. They showed little to no stress in new environments, around new people, or in situations typically considered challenging, and they responded appropriately to new sights and sounds with curiosity and investigation.

These puppies demonstrated very good memory, focus, and problem-solving abilities for their age and developmental stage. Motivation for interaction and food was strong, with a healthy interest in toys as well. Socially, they interacted appropriately with littermates, cats, other dogs, and people. While some occasionally used their mouths during play, they consistently showed excellent bite inhibition and were rarely vocal. All puppies were comfortable with handling and restraint, with many actively seeking out this type of interaction.

Overall, this pairing produced a confident, well-mannered, and socially stable litter with beautifully balanced temperaments.
