

Meet the Parents

Michele x Howie — Parent Overview

Michele:

Weight: 38lbs

Breed: Standard Poodle

Howie:

Weight: 28lbs

Breed: F2 Goldendoodle

Together, this is a repeat breeding, and we are fortunate to have a real, established temperament assessment from the previous Michele x Howie litter to guide expectations for this pairing.

That prior litter benefited from a short adjustment period when introduced to new environments, people, or situations typically considered stressful. Once given that time, the puppies adapted beautifully and showed steady, well-balanced temperaments. They remained curious and investigative with new sights and sounds while demonstrating good emotional recovery.

Overall, these puppies displayed good memory, focus, and problem-solving abilities appropriate for their age and stage of development. Motivation for interaction was especially strong, paired with good food motivation and a healthy interest in toys. Socially, they interacted appropriately with littermates, cats, other dogs, and people. They rarely used their mouths during play and showed excellent bite inhibition when they did. Vocalization was minimal, and no possessive behaviors or behavioral red flags were observed.

All puppies were comfortable and tolerant of handling and restraint. Taken together, this pairing consistently produced puppies that, once settled, were well-balanced, people-oriented, and adaptable—making them a great fit for a wide variety of home environments.
