

# Meet the Parents

## Miley x Rhett — Parent Overview

### **Miley:**

**Weight:** 40lbs

**Breed:** F1 Goldendoodle

### **Rhett:**

**Weight:** 23lbs

**Breed:** Moyen Poodle

**Together,** This pairing benefits from a well-documented, real temperament assessment from Miley's previous litter, which was sired by Rhett's brother, Rhyder. Rhett and Rhyder are very similar dogs, making that prior evaluation a reliable and accurate guide for what to expect from this litter.

The Miley litter consistently produced puppies that were confident and self-assured, showing little to no stress in new environments, around new people, or in situations typically considered challenging. These puppies were naturally curious and investigative, responding appropriately to new sights and sounds, including those that might be startling.

They demonstrated excellent motivation for interaction and food, with good interest in toys. Their memory, focus, and problem-solving abilities were appropriate for their age and stage of development. Socially, they interacted appropriately with littermates, cats, other dogs, and people. While they did use their mouths during play, they consistently showed very good bite inhibition and were rarely vocal.

There were no behavioral red flags or possessive tendencies observed, and all puppies were comfortable and tolerant of handling and restraint. Overall, this pairing produced a very consistent, well-rounded litter with confident, socially appropriate temperaments, and we anticipate this litter will follow beautifully in those same footsteps.
