

# Meet the Parents

## Fifi x Tux — Parent Overview

**Fifi** is a sweet, shy, and deeply affectionate girl with a very gentle spirit. She is naturally reserved and bashful around new people and situations, but when given the appropriate time and space to settle in, she blossoms into an incredibly cuddly, loving companion. Once comfortable, she is a true lap dog at heart—soft, calm, and about as gentle as a poodle can be.

**Breed:** Standard Poodle

**Weight:** 43lbs

**Tux** is her complete opposite in the most lovable way. Reserved and bashful are not words typically associated with him. He is bubbly, bouncy, goofy, and endlessly playful, with a larger-than-life personality that feels entirely his own. Tux is expressive, dramatic in the best way, and seemingly motivated by nothing more than being alive and involved in everything around him. His joy and enthusiasm are impossible to miss.

**Breed:** F1B Goldendoodle

**Weight:** 40lbs

**Together**, Fifi and Tux are expected to produce a litter with a healthy range of dispositions. While there may be a puppy or two that closely mirrors one parent or the other, the majority of the litter is expected to lean toward Tux's bubbly, engaging demeanor, paired with Fifi's sweetness and affection. We anticipate mid to moderate energy levels and puppies that are affectionate, very people-oriented, and well suited for a wide variety of home environments.
