

# Meet The Parents

## Jamie x Slade — Parent Overview

### **Jamie:**

**Weight:** 46lbs

**Breed:** F1 Goldendoodle

### **Slade:**

**Weight:** 14lbs

**Breed:** Mini Poodle

This is a repeat breeding, allowing us to rely on real, established temperament notes from the previous Jamie litter. That litter was overall very confident and self-assured, showing no signs of stress in new situations, around unfamiliar people, or in environments typically considered challenging. The puppies moved through new experiences with ease and emotional stability.

They demonstrated good memory, focus, and problem-solving abilities that were slightly above average for their age and stage of development. Motivation for interaction and food was excellent, with a healthy interest in toys as well. Socially, the puppies were appropriate and well-mannered with one another, with cats, other dogs, and with people. Mouthiness was rare, bite inhibition was excellent when it occurred, and vocalization was minimal. Puppies were comfortable with handling and restraint, showed no possessiveness, and no behavioral red flags were observed.

Together, this pairing has already proven to consistently produce puppies that are confident, balanced, people-oriented, and adaptable. With only subtle differences between individuals, this is a very steady, reliable pairing well suited for a wide variety of home environments.
