

Meet the Parents

Juniper x Rhett — Parent Overview

Juniper:

Weight: 57lbs

Breed: F1 Goldendoodle

Rhett:

Weight: 23lbs

Breed: Poodle

This is a proven pairing, with temperament data from the Juniper litter showing a confident and self-assured group overall. While a couple of puppies benefited from a brief adjustment period in new situations, the litter as a whole showed little to no stress around unfamiliar people or in circumstances typically considered challenging.

These puppies demonstrated excellent motivation for interaction, very good food drive, and appropriate interest in toys. Their memory, focus, and problem-solving abilities were notably above average for their age and developmental stage. Socially, they were appropriate and well-mannered with one another, with cats and other dogs, and with people. While they did use their mouths during play at times, bite inhibition was excellent and vocalization was rare. They were comfortable and tolerant with handling and restraint, with most actively seeking out that interaction. A few individuals bordered on slightly pushy in their desire for attention, but no possessiveness or behavioral red flags were observed.

Together, this pairing consistently produces confident, socially appropriate, and highly engaging puppies with strong cognitive ability and motivation for interaction. With overall consistency across the litter and well-balanced temperaments, these puppies are expected to transition smoothly into a wide variety of home environments.
