## Clementine x Pistachio — Parent Overview

**Clementine:**

**Weight:** 47lbs

**Breed:** F1 Goldendoodle

**Pistachio:**

**Weight:** 11lbs

**Breed:** Mini Poodle

This is a repeat breeding, allowing us to rely on established temperament data from the previous Clementine × Pistachio litter. That group was notably confident and self-assured, showing little to no stress in new situations—whether around unfamiliar people or in environments typically considered challenging. They approached new sights and sounds, including those that could be considered startling, with curiosity and an investigative mindset rather than hesitation.

The puppies demonstrated strong social awareness and appropriate interactions across the board—with one another, with cats, other dogs, and with people. While they did use their mouths at times to initiate or engage in play, their bite inhibition was excellent, and their overall play style remained well-mannered and appropriate. Vocalization was minimal, and no possessive behaviors or behavioral red flags were observed. They were consistently comfortable with handling and restraint, with many actively seeking out that interaction, highlighting their people-oriented nature.

As a group, the Clementine × Pistachio litter was very consistent, with only slight individual variations. They presented as social, playful, eager, and genuinely happy puppies who enjoyed both interaction and exploration. Their balanced temperaments and adaptability made them especially easy to integrate into new environments.

Together, this pairing has proven to reliably produce well-balanced, confident, and socially appropriate puppies. With their engaging personalities, steady temperaments, and natural adaptability, these puppies are expected to transition smoothly into a wide variety of home environments and make wonderful companions for many different lifestyles.
