## Eden Litter Temperament Overview:

The Eden litter is overall a very confident, self-assured, and socially appropriate group of puppies. They show little to no stress in new situations, around new people, or with new sights and sounds, approaching the world with curiosity and investigative behavior. These puppies demonstrate excellent focus, memory, and problem-solving abilities for their age and are highly motivated by interaction with people. Socially, they are very appropriate with one another, other animals, and people, with no red flags or possessive behaviors noted. While they can use their mouths during play, bite inhibition is excellent. The litter overall is very easygoing, tolerant, and adaptable, happily matching the energy and engagement of the people around them. They enjoy handling and closeness with people, but are also capable of entertaining themselves independently when needed. Energy levels are consistently mid level across the board. The puppies are still slightly babyish developmentally, so some personalities will continue to mature and become more defined over time, but overall they are already showing themselves to be sweet, balanced, and enjoyable companions.

## Eden Orange

- **Energy Level:** Mid
- **Personality:** Orange is a personable, happy, and affectionate puppy who naturally enjoys interaction and engagement with people. While still balanced overall, he is slightly more eager in his efforts to gain and maintain attention compared to some of his littermates and can occasionally become vocal when seeking interaction. He enjoys closeness, handling, and affection while still remaining socially appropriate and emotionally balanced overall. Orange is very people-oriented and intuitive, naturally seeking connection and enjoying engagement with those around him. Despite still being slightly immature developmentally, he already shows very nice early qualities for service, therapy, or emotional support style work due to his affectionate nature, human focus, and desire to interact closely with people. He should transition very well into most home environments that will continue engaging and interacting with him consistently.
- **Health Notes:** N/A
