

Meet The Parents

Eden x Jonah — Parent Overview

Eden:

Weight: 17lbs
Breed: Poodle

Jonah:

Weight: 21lbs
Breed: F1B Schnoodle

This is a repeat breeding, allowing us to rely on established temperament data from the previous Eden × Jonah litter. That group was very confident and self-assured, showing no stress in new situations—whether around unfamiliar people or in environments typically considered challenging. They approached new sights and sounds, including those that could be considered startling, with curiosity and an investigative mindset.

The puppies demonstrated excellent memory, focus, and problem-solving abilities, performing above average for their age and stage of development. They showed strong motivation for interaction, along with good motivation for food and toys. Socially, they were appropriate and well-mannered with one another, as well as with cats and other dogs, and with people. While a couple of puppies could be slightly pushy in their desire to gain and maintain attention, this was rooted in strong social engagement rather than any negative behavior.

Mouth use during play was present but paired with excellent bite inhibition, and vocalization was generally minimal, with only occasional attention-seeking behavior. All puppies were comfortable and tolerant with handling and restraint, often actively seeking out that interaction. No red flags or possessiveness were observed across the litter.

Together, this pairing has proven to consistently produce confident, socially appropriate, and highly engaging puppies with strong cognitive ability and people-focused motivation. With their balanced temperaments and adaptability, these puppies are expected to transition smoothly into a wide variety of home environments and make wonderful companions.
