

# Lillian Boys Temperament Assessment

Lillian Litter Play Video

Date of Birth: 3/11/2026

[Lillian x Marcel Litter Album](#)

## Lillian Litter Temperament Overview:

The Lillian x Marcel litter is a very personality-driven, sweet, and engaging group that beautifully reflects both parents. These puppies are affectionate, bubbly, and interactive, with a strong desire to connect with people. While they may take a brief moment to feel fully comfortable in new situations—especially early on—they quickly settle and show their fun, loving personalities.

They are currently still a bit “babyish,” but are doing a great job exploring and engaging with their environment. This litter is very happy overall, with playful, silly energy that comes in short bursts before settling nicely. They are motivated more by interaction than anything else and are very people-oriented.

Energy levels sit around mid, occasionally leaning toward moderate, but never feel overwhelming. They can become slightly mouthy when excited, which is appropriate for their age and stage. Overall, this is a very adaptable, affectionate, and well-balanced litter that will thrive in homes willing to give them a moment to adjust and then engage with them.

---

## Lillian Blue

### POTENTIAL THERAPY / ESA CANDIDATE

- **Energy Level: Mid to Moderate**
- **Personality:** Blue is a very interactive and people-engaging boy who gets excited and matches the energy of those around him. He is sweet, gentle, and well-balanced, with a nice mix of independence and connection. While he enjoys interaction and being with people, he is also content to entertain himself when needed.

He has a calm, steady demeanor and is very tolerant of handling, showing a gentle and easygoing nature. Blue forms nice connections with his people and enjoys engagement, but also shows the ability to be independent, making him a very adaptable companion for a variety of home environments

- **Physical Notes:** Puppy currently has one undescended testicle, which is very common at this age and expected to resolve as he matures. It will not cause pain or affect daily life and has been cleared by our vet.

---

## **Lillian Green**

### POTENTIAL THERAPY / ESA CANDIDATE

- **Energy Level: Mid Level**
- **Personality:** Green is a very personable, affectionate, and engaging boy who enjoys interaction and connection with his people. He is confident without being pushy and shows a playful, happy personality. At this stage, he may look to his siblings for reassurance, but this is simply due to age and will naturally develop into confidence as he matures.

He is gentle with handling, though can be slightly wiggly when excited, and carries a fun, engaging energy. Green is very people-oriented and naturally seeks connection, and based on his engagement, responsiveness, and balanced temperament, he shows nice early potential for therapy or emotional support work. He is a well-rounded and adaptable companion who will thrive in a home that engages with him regularly.

- **Physical Notes:** Puppy currently has undescended testicles, which is very common at this age and expected to resolve as he matures. It will not cause pain or affect daily life and has been cleared by our vet

✦ MEET THE PARENTS ✦

# Meet The Parents

## Lillian x Marcel — Parent Overview

**Lillian** is a sweet, goofy, and deeply engaging girl with a softer, more reserved side. She can be a bit bashful when meeting new people or entering unfamiliar situations, but once she feels comfortable, her personality truly shines. She becomes affectionate, playful, and full of charm, forming strong, meaningful connections with her people.

**Breed:** Mini Poodle

**Weight:** 9.7lbs

**Marcel** shares Lillian's engaging and affectionate nature but brings it with immediate confidence and zero hesitation. He is outgoing, playful, cuddly, and full of life—truly a “work hard, play hard” personality in a compact 12-pound body. Whether he's running, jumping, playing, or snuggling, he gives everything his full enthusiasm, making him a standout favorite in the nursery.

**Breed:** F1B Goldendoodle

**Weight:** 12.5lbs

**Together,** This pairing is expected to produce highly personality-driven puppies with a beautiful balance of sweetness, engagement, and adaptability. While some may initially take a brief moment to adjust to new environments—similar to their mother—they are expected to quickly blossom into outgoing, bubbly, and fun-loving companions. These puppies will likely be especially motivated by human interaction over food or toys, making them incredibly people-focused and emotionally connected. With mid to moderate energy levels, they should fit seamlessly into a wide variety of home environments, particularly those that allow them a little patience upfront as they settle and show their full, joyful personalities.
