## Helena Litter Temperament Overview:

The Helena litter is a very sweet, gentle, and personable group with steady mid-level energy. These puppies may need a little time to settle into new environments, but once comfortable, they become engaging, affectionate, playful, and social. They are naturally focused and show a calm, thoughtful approach to new experiences. Although some were tense during evaluation, they remained tolerant and respectful throughout handling. Their confidence and energy may continue to grow as they mature and become more secure. Overall, this litter will do best in calmer, supportive homes that allow them time to adjust and build trust before expecting their full personalities to shine.

## Helena **Blue**

- **Energy Level:** Mid Level
- **Personality:** Blue is a sweet, gentle, and focused puppy who needs some time to become comfortable in new situations. He may appear tense or unsure initially, but remains tolerant and respectful while he adjusts. Once settled, he shows a well-balanced personality with a nice mix of independence and engagement. His confidence made some areas of his evaluation more difficult to fully assess, but he is expected to become more interactive and playful as he matures. Blue will do best in a calmer home that allows him to adjust at his own pace and build a secure bond with his people.
- **Physical Evaluation:** Puppy currently has two undescended testicles. This is very common at this age, and we expect them to descend as he continues to mature. This will not cause pain or affect daily life and has been cleared by our vet. His bite is level.
