Cinderella Litter Temperament Overview:

Cinderella and Bud bring together such a lovely mix of **affection, gentleness, personality, and playfulness**. Cinderella is an incredibly sweet, charismatic girl who seeks connection softly and would choose being a lap dog whenever possible. Bud adds a little more sparkle—he is outgoing, bubbly, playful, funny, and approaches life with a wonderfully happy enthusiasm.

Their puppies are developing into a **sweet, gentle, respectful, tolerant, and well-balanced group**. They are not fearful puppies, although several appreciate a brief moment to take in something unfamiliar before their confidence and personality fully come forward. As they continue to mature and gain experiences, we expect their confidence and engagement to continue strengthening.

Energy is a consistent **mid level across the litter**, with a natural rise during play and interaction. They have that soft, affectionate side inherited from Cinderella alongside some of Bud's playful enthusiasm, giving them a lovely balance between companionship and fun.

This litter also has **promising early service and therapy potential**, with strong human engagement, people orientation, tolerance, and balanced temperaments throughout the group. As an added bonus, these puppies are **genetic non-sheds**!

POTENTIAL SERVICE + THERAPY CANDIDATE

- **Energy Level:** Mid — Excites with Interaction

- **Personality:**

Cinderella Pink is a **sweet, gentle, affectionate, and engaging girl** with a thoughtful approach to unfamiliar situations. She may appreciate a brief moment to understand something completely new, but she adjusts and becomes **self-assured, easygoing, personable, and well balanced** once comfortable.

Pink naturally leans toward her people and showed **great human engagement**. She remained tolerant and receptive during handling even while initially processing something unfamiliar, showing a gentle nature and a nice ability to become more comfortable with time and positive experiences.

Her baseline energy is **mid level and rises naturally with play and interaction**. She has plenty of room for fun and engagement with her family while maintaining a manageable everyday energy level.

Pink showed **great early potential for service and therapy development**. Her people orientation, engagement, sweetness, tolerance, and ability to adjust provide a promising foundation, with maturity and continued positive experiences expected to further strengthen her confidence.

Pink will do especially well in an **engaging, predictable home environment** that gives her a brief moment to acclimate to unfamiliar situations. She is an affectionate, connected girl with a lovely balance of gentleness, sweetness, and playful personality.

- **Physical Evaluation:**

Pink has a small umbilical hernia. This is very common at this age and is not a health concern. It will not affect daily life or cause pain and can be easily corrected at the time of spay if still present.

She also has some tear staining noted at this age, which is expected to fade.
