Marnie Litter Temperament Overview:

Marnie and Butter have produced a litter with a beautifully **sweet, gentle, affectionate, and people-oriented foundation**. These puppies reflect their parents especially well in the softness of their interactions—they enjoy people, play, and curiosity without presenting as overly intense puppies.

One of the strongest themes throughout the litter is their natural **preference for people**. Even several of the puppies who needed more time to become comfortable in the evaluation environment still showed good human engagement and a desire for connection. Confidence varies between individuals: some become comfortable after only a brief moment, while others are more thoughtful and benefit from additional time to understand something unfamiliar.

Energy is remarkably consistent at a **mid level**, with a few puppies becoming more animated through handling and interaction. Overall, this creates a nicely manageable group with enough playfulness and curiosity to enjoy everyday family life while maintaining the even, balanced energy expected from Marnie and Butter.

Several puppies show **promising early therapy/ESA qualities**, particularly through their affection, tolerance, engagement, and people orientation. Others are currently best characterized by their sweetness, gentleness, thoughtful nature, and growing confidence. Matching will be important: some can adapt comfortably to nearly any household, while the more thoughtful puppies will shine brightest in **calmer, more predictable home environments** that give them a moment to acclimate.

Overall, this is a wonderfully **soft, affectionate, balanced companion litter** with a lot of natural sweetness and connection to people.
