Michele Litter Temperament Overview:

The Michele litter is a **sweet, gentle, playful, and nicely balanced group** with wonderful personalities beginning to emerge. These puppies have a softer approach when experiencing something brand new and may initially take a moment to observe and process, but once they settle in, they show themselves to be **happy, curious, social, tolerant, and engaging companions**.

One of the most consistent qualities throughout this litter is their **overall balance**. Every puppy evaluated showed a healthy middle ground between human connection and independence, along with good handling tolerance once comfortable. They are not puppies who immediately throw themselves into every unfamiliar experience; instead, they benefit from a little time to take things in before their personalities fully come forward.

Energy is exceptionally consistent at a **true mid level across the entire litter**, giving these puppies a wonderful balance for everyday family life. They have plenty of personality, playfulness, and curiosity while still presenting with an overall manageable and versatile energy level.

There is also **promising therapy potential within this litter as their confidence continues to develop**. Their evaluations consistently showed gentle, tolerant, balanced qualities, but confidence was the primary area they still need to strengthen before we would consider them stronger working prospects. At this young age, needing time and positive experiences to build confidence is very normal puppy behavior. Continued socialization, maturity, and positive exposure should give these puppies the opportunity to build upon the wonderful foundational qualities they already possess.

Overall, this is a **sweet, playful, gentle, balanced, and personality-filled litter** with wonderful companion qualities and exciting room to continue developing. With Michele and Ace both bringing such fun, affectionate, outgoing personalities to the pairing, we are excited to watch even more of those qualities emerge as these puppies mature. Their color is expected to **stay the same**, and the litter carries **3/4 Low Shed Genetic Markers**. This is also Michele's **final litter**, making this an especially special group.

She is simply an incredible girl with a personality that is impossible to forget.

Ace is very much on the same wavelength. He is outgoing, affectionate, playful, athletic, goofy, and incredibly endearing. Ace is one of those dogs who "feels big feelings," and he is more than happy to let everyone around him know exactly what those feelings are. Somehow both too smart for his own good and hilariously absent-minded at the same time, Ace has a wonderfully unique personality that makes him an absolute favorite.

Breed: F1B Goldendoodle

Weight: 52lbs

Together, Michele and Ace are expected to produce puppies that are certainly not lacking in personality. We anticipate goofy, sweet, outgoing, confident, and loving puppies that approach life with the same enthusiasm as their parents. With mid to moderate energy levels, strong engagement, and excellent potential for service work, this litter should be especially well suited for interactive homes looking for a fun, intelligent, and deeply connected companion.
