Date of Birth: 8/21/2026

Wanda Litter Temperament Overview:

Wanda and Howie are both wonderfully **people-oriented, outgoing, sweet, and engaging dogs**, and those qualities came through beautifully in their puppies. Wanda brings a very balanced, self-assured demeanor with a gentle way of seeking connection, while Howie is outgoing, charming, and genuinely happy to be included in whatever his people are doing.

Overall, this is a **confident, outgoing, curious, playful, and personable litter**. These puppies genuinely enjoy human interaction and tend to lean toward their people, making connection and engagement a strong theme throughout the group. They are bright, social babies who like being involved and are happiest when they have opportunities to play, learn, interact, and participate alongside their families.

Energy varies more within this litter than some, but the overall picture is **balanced energy with a strong interactive side**. Some puppies sit comfortably at a textbook mid level, while others become more animated during play and engagement or settle more readily during handling. They are not one-size-fits-all energetically, which gives us a wonderful range for matching each puppy to the right family.

There are also some **very promising early working prospects within this litter**, with individual puppies showing strong human focus, confidence, handling tolerance, engagement, and attention to their people. Like puppies this age, they are still developing appropriate ways to communicate their excitement and desire for attention, and continued training will help channel that enthusiasm into wonderful manners and focus.
