Eden Litter Temperament Overview:

Eden and Rocket are both **outgoing, affectionate, playful, engaging, goofy, and highly people-oriented dogs**, creating a pairing expected to produce puppies who genuinely want to be part of whatever their families are doing. Eden is cuddly, hilarious, incredibly smart, and always ready to join in, while Rocket brings that same playful, affectionate enthusiasm—whether it is fetch, chase, hide-and-seek, or simply being included.

That personality is showing beautifully in this litter. Overall, the Eden puppies are **very affectionate, engaged, kissy, confident, social, playful, silly, and happy**. They have strong motivation for interaction and naturally seek connection with their people.

Working potential is a particular strength within this litter. Their motivation, confidence, engagement, and people focus create **great early potential for Service and Therapy work, including potential for The Pawtism Project**. Individual working suitability will still depend on each puppy's specific temperament and continued development.

The litter generally presents around **mid-level energy that becomes more animated with interaction**, although there are meaningful individual differences. Some remain consistently mid-level, while others—particularly Green—present with more sustained moderate energy. Overall, these puppies will thrive with families who enjoy an **engaging, interactive home life** and want their puppy actively involved in the fun.

POTENTIAL SERVICE + THERAPY CANDIDATE

- **Energy Level:** Mid — Consistent & Balanced

- **Personality:**

Eden Red is a **well-balanced, gentle, affectionate, sweet, tolerant, and engaging girl**. She was relaxed during her initial handling evaluation and presents with a thoughtful, balanced temperament.

Red can **need a brief moment to adjust initially**, but she is able to work through that adjustment independently rather than requiring constant reassurance. Once comfortable, she becomes affectionate and highly engaging, with a slight natural preference toward her people.

She is **very tolerant of handling** and maintains a consistent mid-level energy throughout her evaluation. Her combination of connection and balance allows her to be interactive without the more intense presentation seen in some of her littermates.

Red showed **incredible early potential for Service and Therapy work**. Her engagement, tolerance, affection, balanced energy, and ability to process an initial adjustment independently create a promising foundation for continued working development.

She should do well in **a wide variety of homes that give her a reasonable opportunity to acclimate rather than immediately overwhelming her**. Her 16-Week S.U.P.E.R. Puppy Program will also provide extensive time for training, socialization, confidence building, manners, and continued development.
