

Meet The Parents

Sage x Brody — Parent Overview

Sage:	Brody:
Weight: 29lbs	Weight: 19lbs
Breed: F1B Goldendoodle	Breed: Moyen Poodle

This is a repeat breeding, allowing us to rely on established temperament data from the previous Sage litter. That group was confident and self-assured, showing no stress in new situations—whether around unfamiliar people or in environments typically considered challenging. They approached new sights and sounds, including those that might be startling, with curiosity and an investigative mindset.

The puppies demonstrated above-average memory, focus, and problem-solving abilities for their age and stage of development. They showed excellent motivation for interaction, along with strong drive for food and toys, making them highly engaging and responsive. Socially, they were appropriate and well-mannered with one another, as well as with cats, other dogs, and people. Mouth use during play was minimal, paired with excellent bite inhibition, and vocalization was rare. No red flags or possessive behaviors were observed across the litter.

All puppies were comfortable with handling and restraint, with many actively seeking out affection and interaction. As a group, they were very consistent—loving, affectionate, and eager to please. Their calm, intuitive nature combined with strong social confidence made many of them excellent candidates for therapy or service work.

Together, this pairing has proven to consistently produce well-balanced, confident, and highly people-oriented puppies. With their intelligence, adaptability, and gentle, engaging temperaments, these puppies are expected to transition seamlessly into a wide variety of home environments and thrive as both companions and potential working dogs.
